

Press Release:

# The Greeny Flat's **FIRST** **EARTH-DAY PARTY**

The Greeny Flat is a full-scale living experiment currently underway in Mittagong, NSW, to see if it's possible to build a small, comfortable, healthy, energy positive, low-maintenance, fire-resistant, water-efficient, elderly-friendly infill house at an affordable price. Earth Day 2015 will mark the end of our first year of living in, and monitoring the performance of, the Greeny Flat and we're excited to say that the experiment is proving to be a resounding success. We have met or exceeded all of our original goals and expectations. Of particular note is the fact that we have exported almost four times as much power to the electricity grid as we have imported from it over a full year.

On Earth Day (April 22nd, 2015) we will holding a small party to mark this important achievement in energy positive and affordable home design and construction. Please help us to spread the word and all are welcome to join us for the celebration on:

**APRIL 22nd—3-7pm**  
**16A QUEEN ST, MITTAGONG, NSW**
